

Want to bring your business to the World Wide Web? It may not cost as much as you think...

A **self-managed website** will allow you to update and make changes to your site yourself, with very little knowledge of web mastering.

All of our clients are able to make changes to the content on their pages, and add/edit products in their shops themselves, via a simple interface. This saves them money every year.

We can setup a self-managed site for you from about \$800.

The first point-of-call for many people these days, when looking for a product or service, is the internet.

**GET YOUR BUSINESS ON GOOGLE!!!**

Show your customers you mean business, and let them find YOU the easiest way THEY know how. Even a Yellow Pages listing cannot compete with the power of search engines such as Google and Yahoo.

We will help you find a design to suit your business/corporate image, and depending on your budget, we can customise this to any extent you require.

We can also provide a completely custom design for you.

Visit us at

[www.elegantlogic.com.au](http://www.elegantlogic.com.au)

to find out more information, and to see our portfolio.

We can provide a solution to fit your budget, and the tools and advice to give you the confidence to manage your own online presence.

All prices are estimates, and include the design and implementation of your website, as well as assistance with domain registration, hosting and email setup. We can provide an accurate, obligation-free quote once we have details about your requirements.

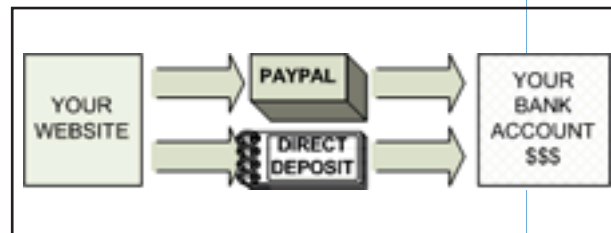

**\$800** - Basic Layout lightly customised with your colours and logo. Many basic website functions can be included.

**\$1200 to \$1500** - Fully customised layout with your colours and logo. Additional website functions can be added (e.g. custom forms, online catalogue, galleries)

**\$2000 to \$2500** - Fully customised design, built to your specification.

**Online stores** can also be setup in your site, to allow you to provide either an online catalog, or a complete online shopping solution for your customers.

We can incorporate **Paypal**, many different **payment gateways**, and your own merchant provider's facilities (where possible).

Whatever your business does - service providers and product retailers of all kinds are joining the internet community everyday. The internet is in most homes in Australia, and millions of homes around the world - take advantage of the exposure!

In the long-run, the value is far greater than advertising in your local newspaper:

\* Your site is available 24 hours a day, 365 days a year

\* The only on-going costs are your domain name (about AU\$12 a year) and your hosting (about AU\$170 a year)

\* You can use email addresses on your own domain (e.g. ronald@mcdonnards.com.au)
