? You may or may not wish to use the **Global Inbox** – if you are setting up multiple email accounts, they can be easier to manager when each has its own inbox.

Once you are ready to move on, click **'Next'**;

You may be asked to setup an SMTP server, if you do not already have one configured in Thunderbird. It is preferable to use your Internet Provider's SMTP service, as some ISPs will block your use of an external SMTP mail server.

6. Enter you user name in the correct syntax, **'mailbox@yourdomain.com'**, then click **'Next'**;
